EDUCATION

Bachelor of Computer Science (BS)

University of San Francisco

2009 - 2013

SKILLS

• Web / Mobile Frontend Skills

HTML,	CSS3,
SASS,	LESS,
Javascript,	ES6/7,
Typescript,	React JS,
Redux,	Angular,
Typescript,	Vue JS,
Next.js,	Semantic UI,
Material UI,	Ant Design,
React Native,	java,
Swift,	Kotlin,

SUMMARY

I am a highly experienced Web and Mobile Developer with 10 years of professional experience in iOS, Android, and Web development. I specialize in building dynamic and responsive front-end interfaces with a focus on high-quality deliverables. My portfolio includes projects across a variety of industries, such as Fintech, eCommerce, Healthcare, and Social Apps. With over 8 years of experience in React/React Native, I strive to build pixel-perfect, functional, and optimized front-ends supported by robust back-ends.

- 10 years of object - oriented programming knowledge and experience in developing Professional Web and Mobile applications and Enterprise solutions using Web and Mobile Technologies .
- Expertise in modern web architecture using various advanced JavaScript frameworks and libraries like , React.js/Redux, React Native, Next.js, Angular.js, Node.js, Bootstrap, Ember.js.
- Experienced in using React JS components, Forms, Events, Keys, Router, Animations and Flux concept.
- Hands on experience in **React JS - Redux** architecture.
- Experience of working on CSS Preprocessors like LESS and SASS along JavaScript task runners like GruntJS.
- Proficient in Native Android application framework and Android SDK tools.
- Experience in Cross-Platform Mobile Development using **React Native** + Type Script based mobile app.
- Especially innovation in software development with a strong focus on **Kotlin** for Android OS.
- Experience in using Mobile Frameworks like Flutter, Phone Gap, jQuery mobile, Kendo UI for **IOS and Android** Platforms.
- Familiar with Adobe Creative Suite and various **UI/UX** design tools for creating Wireframes and prototyping.

Flutter,
React Navigation

Ionic,

- **Web / Mobile Backend Skills**

Javascript,	Node JS,
Express JS,	Python,
Django,	Java,
C#,	.Net
Core Java,	Spring Boot,
Kotlin,	Spring,
REST API,	GraphQL,
JSON,	Firebase,
MySQL,	MongDB,
PostgreSQL,	Oracle,
Apache,	Nginx,
IIS servers,	Azure,
AWS,	AWS Lambda,
Paas,	SaaS

- **Testing tools**

Jest,	Jasmine,
Mocha,	Chai,
Karma	

- **Other skills**

GitHub,	Bitbucket,
Agile-Scrum,	Jira,
Asana,	Kubernetes
CI/CD,	Jenkins,
Travis CI,	Docker,
Webpack	

- Experience in A/B Testing, usability testing including user profiles and personals, task analysis, contextual research, test moderation, and reporting.
- Proficient in working with various technologies like **Core Java**, Spring, Spring Boot, REST Web Services and Design Patterns.
- Experience with Web Development, Amazon Web Services, Python and the Django framework.
- Strong experience in developing **MERN** (MongoDB 3x, **Express.js**, React.js and Node.js) and **MEAN** (MongoDB 3x, Express JS, Angular JS 1.x and Node JS) stack application.
- Involved in unit testing of various modules by generating the test cases using **Jest**, **Jasmine**, Mocha, Enzyme, Chai and Karma.
- Strong in developing RESTful APIs using Node JS to offer an easy and safe way to build high performance and scalable network application.
- Writing reusable, testable, and efficient code using **Node js** with express framework and sockets concept.
- Experience in Integration of Amazon Web Services (**AWS**) and **Azure** with other applications infrastructure.
- Experience in RDBMS databases connectivity (JDBC), Oracle, **MySQL**, DB2, PostgreSQL, NoSQL, **MongoDB**, Cassandra DB.
- Integrated multiple React Native modules such as react navigation and react native firebase.
- Analyzed and resolved production system problems tracked with **JIRA**
- Excellent experience in **Git/GitHub** and Tortoise SVN for source code management and for version control.
- Experience with DevOps tools like **Azure**.
- Good experience in automated build process by using **Jenkins** and Maven.
- Implemented and operated **Agile (Scrum)** Software Methodology.
- Strong experience in writing and updating the technical documents on daily basis with the changes made to the existing environment on daily basis.
- Experience of working with latest concept of C# like Generic Collection, Custom Attribute, Reflection, Partial Class etc.
- Experience in Software life cycle phases like Requirement Analysis, Implementation and estimating the time-lines for the project.

WORK EXPERIENCE

Lead Frontend Developer

Brocoders, San Francisco, CA

Jul 2020 - Feb 2023

- Responsible for building out the static UI, added the dynamic attributes to large application.
- Created custom Push Notifications, RESTful APIs, and interaction using React-Native-Camera.
- Involved in developing the mobile application for both IOS and Android platforms.
- Used React Router for developing Single Page Applications SPAs.
- Involved in SDLC Requirements gathering, Analysis, Design, Development and testing of application using AGILE methodology (SCRUM) and TDD Development.
- Creating new React components, containers, services, and APIs.
- Used Java/J2EE Design patterns such as Singleton, Service Locator and Spring IOC pattern and responses.
- Used React JS for templating for faster compilation and developing reusable components.
- Used React-Autocomplete for creating google maps location search on the webpage.
- Developed a front-end mobile application using React Native, Redux, Flex and JavaScript.
- Developed login/signup feature integrating Firebase with social media such as Facebook and Google.
- Translate the designs from our design team into reusable interactive React native components.
- Worked on AWS to integrate the server side and client side code.
- Extensively used Git for version controlling and regularly pushed the code to GitHub.
- Performed Unit testing on React JS applications using tools like Jest.
- Work with the UI/UX, product owner, executive team and developers to understand the requirements and write the mobile apps using industry standard coding.

Technologies Used :

ReactNative, React, Redux, IOS/Android, NodeJS, HTML, CSS, JavaScript, Java, Core Java, React-Navigation, App center, Axios, JSON, NPM, ES6, GitHub, Webpack, TFS, AGILE, Firebase, AWS cognito, AWS amplify, Visual Studio Code, Jest, Jenkins, Xcode

React / React Native Developer

Xicom Technologies, San Francisco, CA

Mar 2016 - Jun 2020

- Responsible for porting an existing web application into mobile view .
- Responsible for design and development of various components such as tab bars, map view, image picker, date picker, push notifications, sign-in/out features, profile management and navigation using react-native.
- 100% Code coverage on critical components, using coverage collection built into project testing framework (i.e. jest).
- Implemented and developed various screens for the frontend using React.js and used various predefined components from NPM (Node Package Manager) and redux library.

- Elegantly used React-Router techniques Axios service to retrieve data from server synchronously in the background without interfering with the display and existing page in an interactive way.
- Developed Single Pages Application using HTML5, CSS3, Bootstrap, React Async Await, Nextjs, GraphQL, Express js, NodeJS, Socket, LESS.
- Created React.js components using JSX and Virtual DOM Followed Redux Architecture for unidirectional data flow and manage the data in React and Make HTTP requests in React & Redux.
- Managed side effects in redux code with sagas (redux-saga) in order to maintain function purity in action creators.
- Used Redux Thunk middleware to allows write action creators dat return a function instead of an action.
- Used a React/Redux front end and GraphQL/AWS backend to build a SAAS platform for users.
- Implemented a CI/CD pipeline with Docker, Jenkins and GitHub by virtualizing the servers using Docker for the Dev and Test environments by achieving needs through configuring automation using Containerization. issues and worked on a queue of JIRA tickets to address system issues, user requests, etc. on a daily basis.

Technologies Used :

React-native, React-Navigation, native-base ,android studio, Xcode, Core Java, Web Storm TFS, ES6, JavaScript, Type Script, React JS, Redux, Redux-Saga, Redux-Thunk, Webpack, Git, node.js, Azure, C#, .Net, XML, MongoDB, GraphQL, Docker, JIRA, firebase, Mac OS, Material UI, Ant Design, LESS, SASS.

Full Stack Developer

ELEKS , San Francisco, CA

Oct 2013 - Feb 2016

- Responsible for developing a front-end application using React.js and Redux architecture for internal team's productivity use.
- Developing dynamic web pages using jQuery, React.JS, Node.JS.
- Used ECMA Script 6/ES6 for building features like arrow functions, template strings, class destruction and modules.
- Integrated the model and view part using Model View Models (MVVM) and developed user interface by using the React.js, Redux for SPA development.
- Created React.JS components using JSX, followed FLUX design pattern for unidirectional data flow.
- Build React components and stand-alone functions to be added to any future pages.
- Created Typescript reusable components and services to consume REST API's using Component-based architecture provided by Angular6 and Angular8.
- Created reusable templates using Angular directives and worked with NPM package manager tools (Node JS).
- Created UI templates for final look and feel using HTML5, Fireworks, AXURE, Flash, Dreamweaver and Photoshop.
- Developed UI components for email and link sharing of documents and files for a Content Management System using Require.js, Backbone.js and jQuery.

- Worked with Databases like MongoDB and AWS(DynamoDB) for querying.
- Worked with AWS, EC2 server and s3 storage to deploy functional prototypes.
- Deployed web applications using Azure toolkit in eclipse.
- Developed Application with ASP.Net MVC 4.5 Framework and C#
- Worked with version control systems (GIT), Bitbucket, Docker to keep track of development state.
- Designed/Developed Ajax Driven Web based application using JavaScript, Ajax, JSON.
- Followed Agile (SCRUM) methodologies for Software Development.

Technologies Used :

React.js, Node.js, Angular, Object Oriented JavaScript, jQuery, JSON, AJAX, HTML, DHTML, CSS, C#, .Net, Agile methodology, Dreamweaver, MVP, Jest, Jasmine, MySQL, Windows, PostgreSQL, AWS, Azure, Ant Design, Material UI
